

Vinart theme documentation

Introduction

Thank you for purchasing my theme. If you have any questions that are beyond the scope of this help file, please feel free to email via my user page contact form [here](#). Thank you!

Theme construction

Vinart is designed with a modular approach, providing flexibility and ease of customization. It is built on WordPress with Elementor as the visual content editor. Here's a brief overview of how the theme is constructed:

1. **Elementor Modules:** Custom modules enhance Elementor's functionality, allowing for advanced layouts without coding.
2. **Header and Footer System:** Built-in templates let you design and customize headers and footers within Elementor, similar to Elementor Pro.
3. **WooCommerce Integration:** Seamless WooCommerce support with custom product pages, shop layouts, and cart styles.
4. **Theme Options/Page options Panel:** An extensive options panel offers control over colors, fonts, layout, and more, ensuring full customization of your site.

Installation

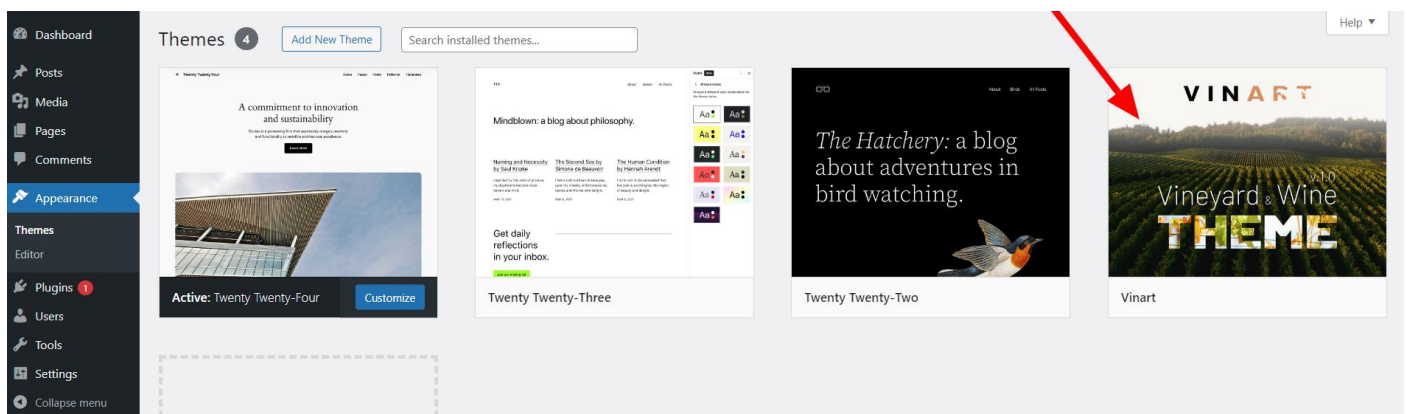

For proper installation please follow the next steps. Also please check the WordPress installation guide, which you find here [Installing WordPress](#)

A. FTP Installation (manual)

Vinart Vineyards Wordpress Theme

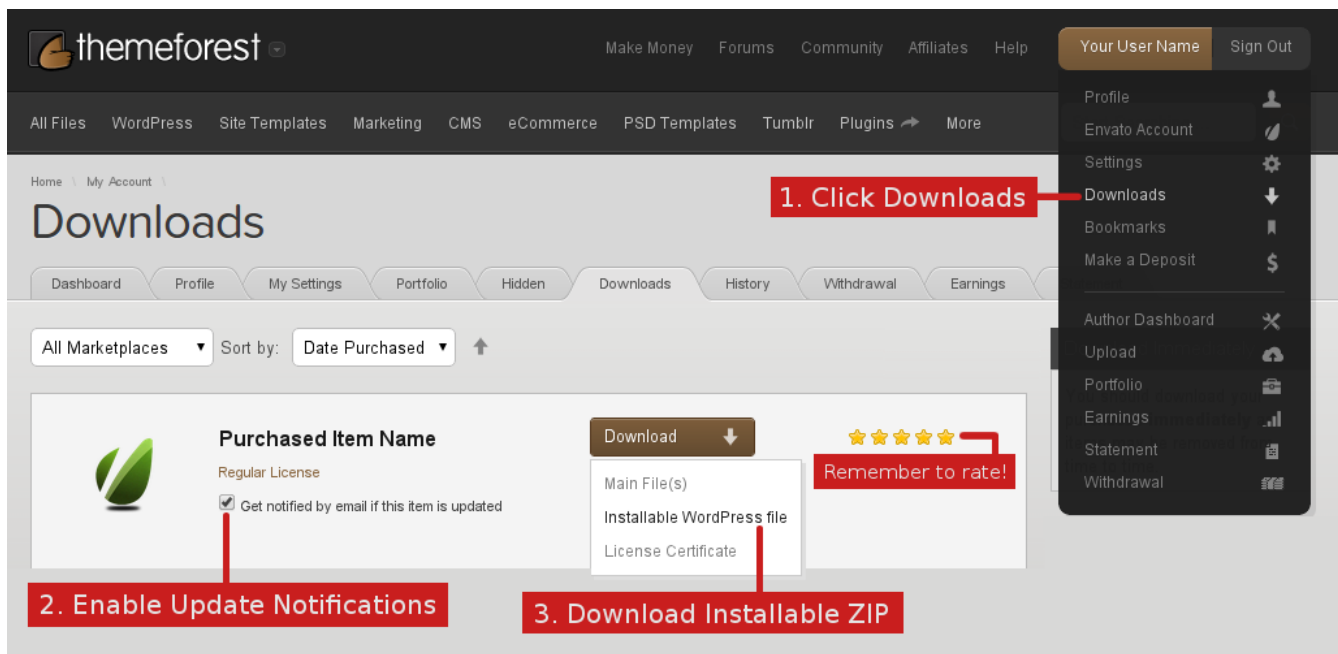

Created: 23/05/2024 | By: Cristian Gogoneata | Email: cristian.gogoneata@gmail.com | www.okthemes.com

1. First of all, your server should support **PHP 7.4.x**. You will also need an installation of WordPress . If you don't have one, download it from [here](#) and follow instructions on the WordPress site on how to install it correctly.
2. If you have a running installation of WordPress , place the theme files from the download into the “themes” folder. The path to this folder should be something like **/WordPress_install_dir/wp-content/themes/**. Make sure that all theme files **(without the PSDs and help files !)** are in the separate folder called **“vinart”**. The path to the theme files should be **/WordPress_install_dir/wp-content/themes/ vinart** upon completion of this step.
3. Enter you WordPress Admin Interface. It should be available at <http://yourdomain.com/wp-admin>.
4. In the left menu, find **Appearance** tab. Click it. A submenu should appear. Click **Themes**.
5. The themes screen should show all of your installed themes.
6. Find **Vinart** theme and hit **Activate**.

B. Through WP administration panels

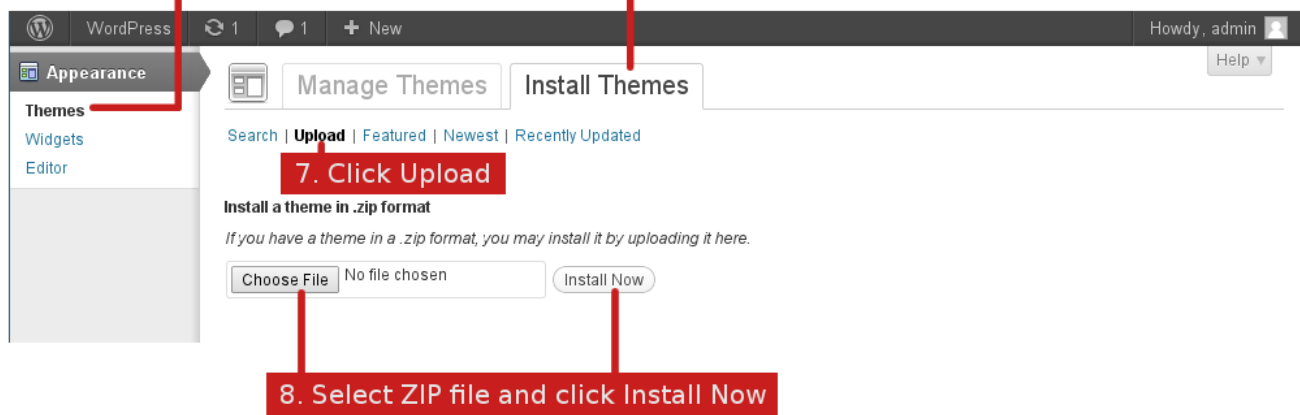

1. Log in to WordPress
2. Select the **Appearance** panel, then **Themes**.
3. Select Install Themes
4. Use the sub-menu and click on **Upload**. Choose the file **Vinart.zip** from the package you downloaded from TF and click **install now**.

4. Login to WordPress

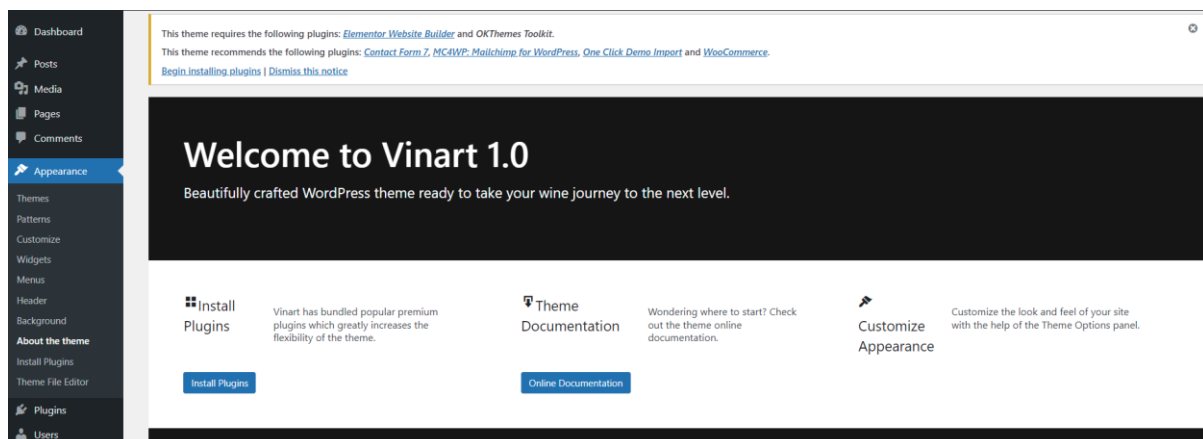

5. Click Appearance - Themes menu

6. Click Install Themes

C. Continuing install

Now as you have installed the theme, let's continue with the installation of **plugins** and **demo content**. Once you hit **Activate** you will be redirected to the demo panel:

Vinart Vineyards Wordpress Theme

Created: 23/05/2024 | By: Cristian Gogoneata | Email: cristian.gogoneata@gmail.com | www.okthemes.com

Here you have available the following features:

1. Install theme plugins
2. Install theme Demo Content (***One Click Demo Import** plugin must be installed*)
3. Customize theme options

Now, we will be focusing on the first 2 – the most important ones.

1. Install theme plugins

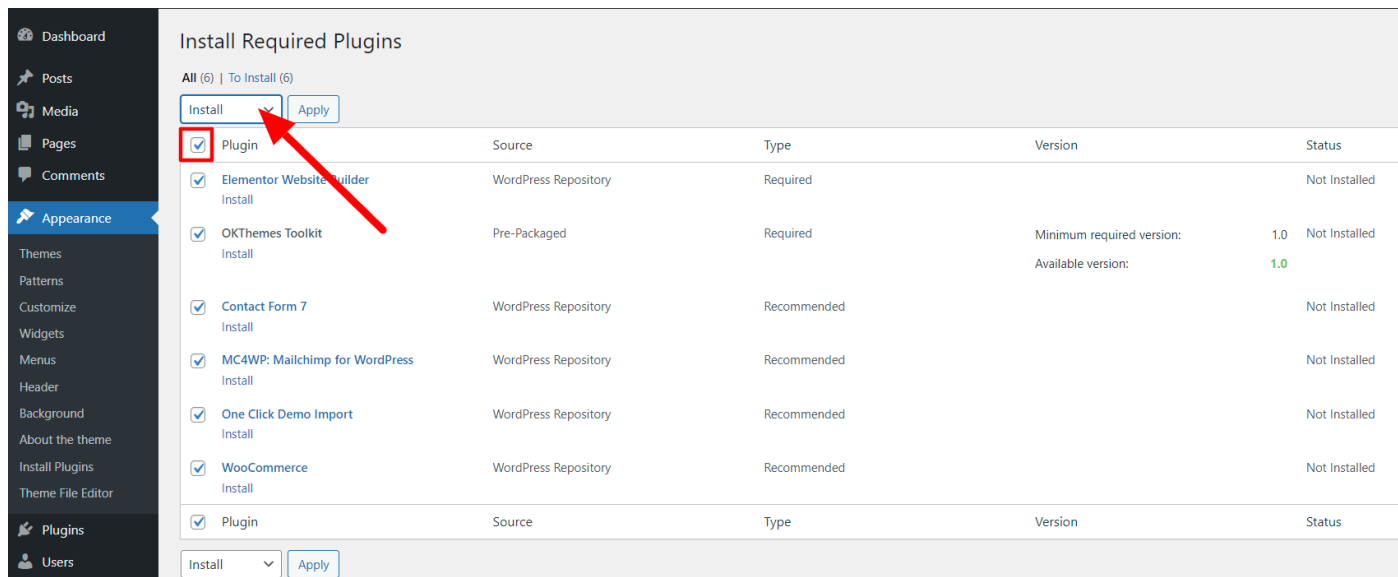

This is a very important step and must be done first. It is recommended that you install and activate all plugins to use the full functionality of the theme.

Once you click the “Install plugins” button you’ll be redirected to the **Install plugins** page.

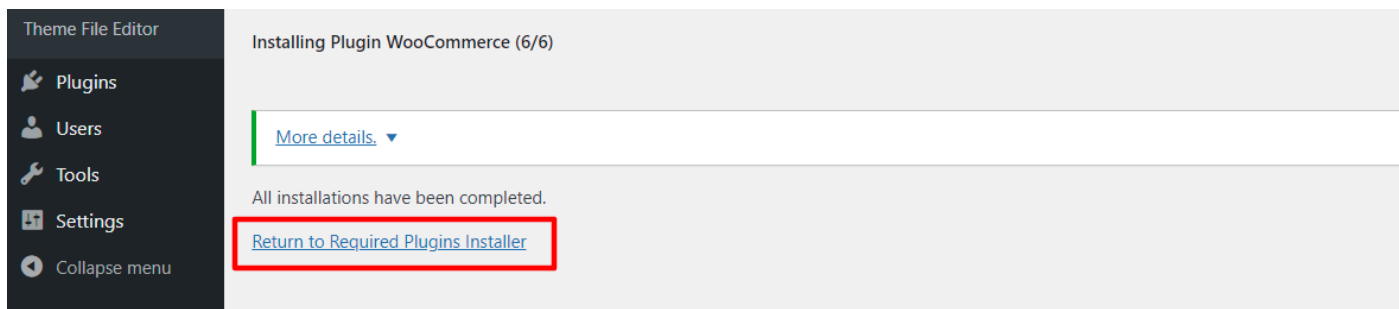

Also, you have available a message box on every admin page stating **“This theme requires the following plugins.....”**. You can click on **“Begin installing plugins”** - you’ll be redirected to the same page.

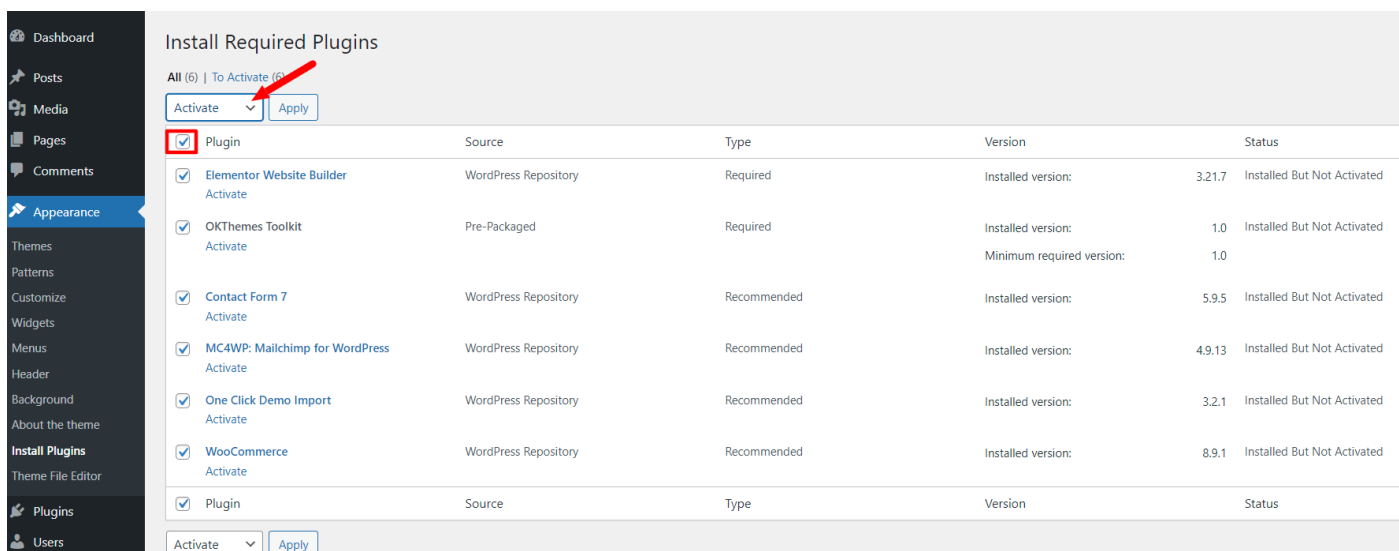

Now, click on the checkbox next to “Plugin” to select all the plugins, then from the select box above select “Install” and click the “Apply” button. This will automatically install all the necessary plugins.

After all the plugins are installed click on **“Return to Required Plugins Installer”** to activate them.

Next you need to activate the plugins. You'll be redirected to this page where you repeat the steps above and select **“Activate”** instead of **“Install”**.

After successful activation you will be asked to return to the dashboard.

Now we'll proceed with the installation of theme demo content.

1. Install theme Demo Content

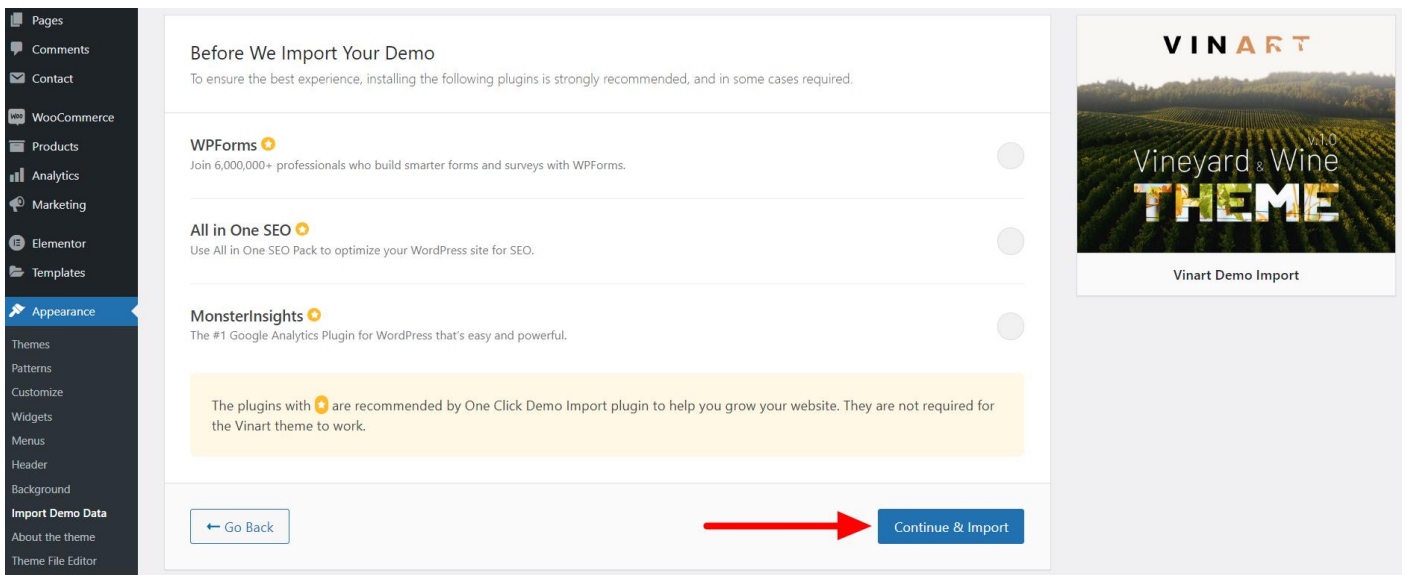

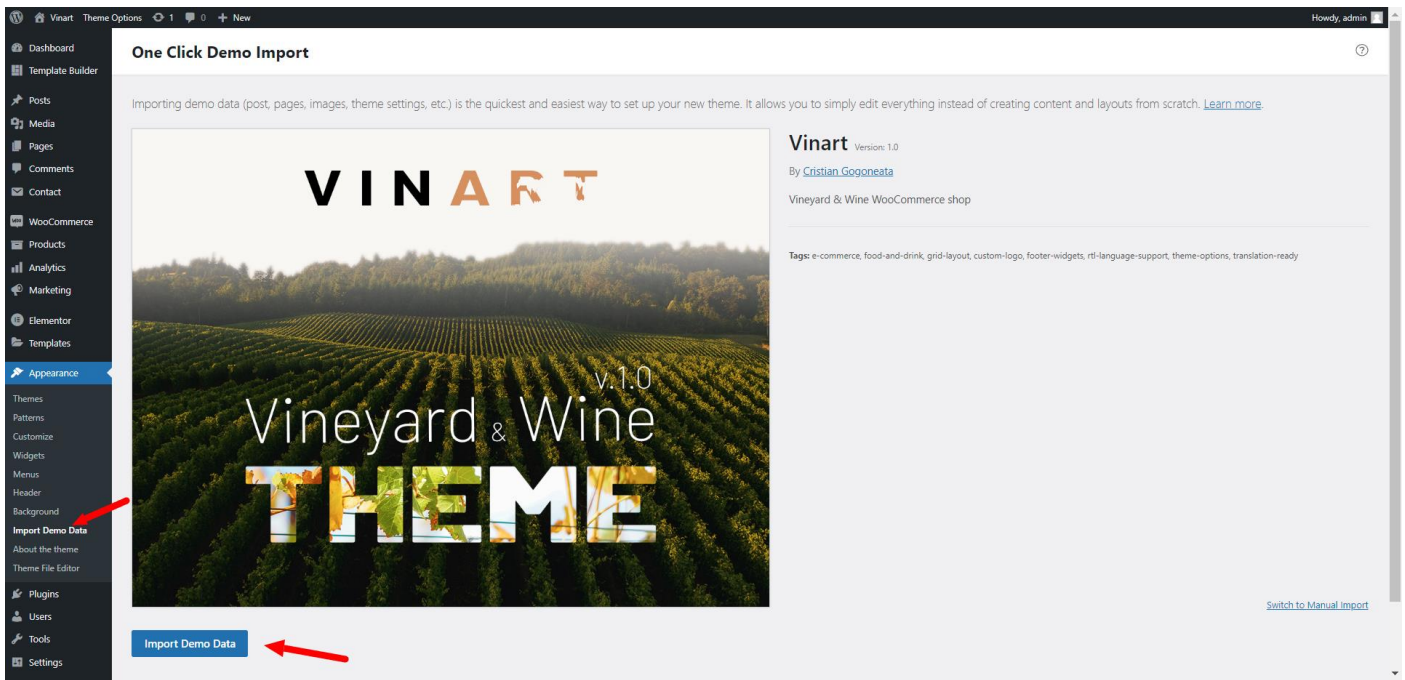

The demo content is available only with the activation of **One Click Demo Import** plugin, so please make sure the plugin is activated before continuing further.

The demo content will install: pages, posts, post types, dummy images, menu settings, widget settings, WooCommerce settings and Elementor templates.

If you need them separately, they're available in the **theme/admin/importer/demo-files** folder inside the theme.

The demo install is done with **1 click install**.

1. Go to **Appearance >> Import Demo Data** and then click on **“Import Demo Data”**

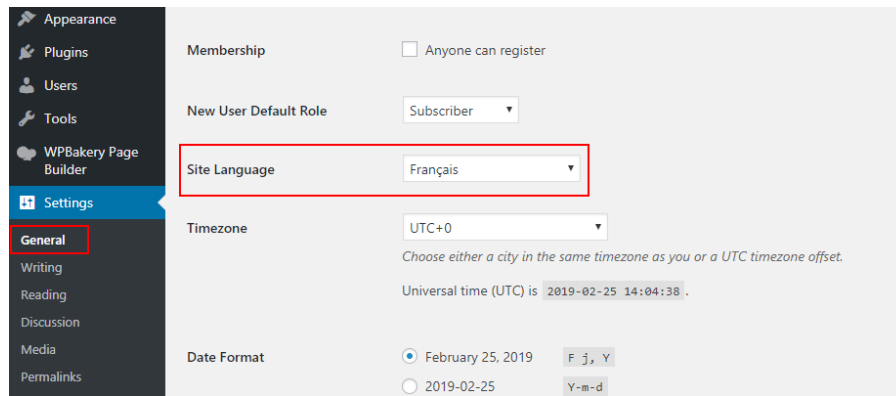

That's it, you have demo content and all the theme settings installed on your website.

Install the theme in other language

First you have to install WordPress in your specific language. This can be done by going to **Settings -> General**, where you can set the **Site Language** option and save the settings.

Vinart Vineyards Wordpress Theme

Created: 23/05/2024 | By: Cristian Gogoneata | Email: cristian.gogoneata@gmail.com | www.okthemes.com

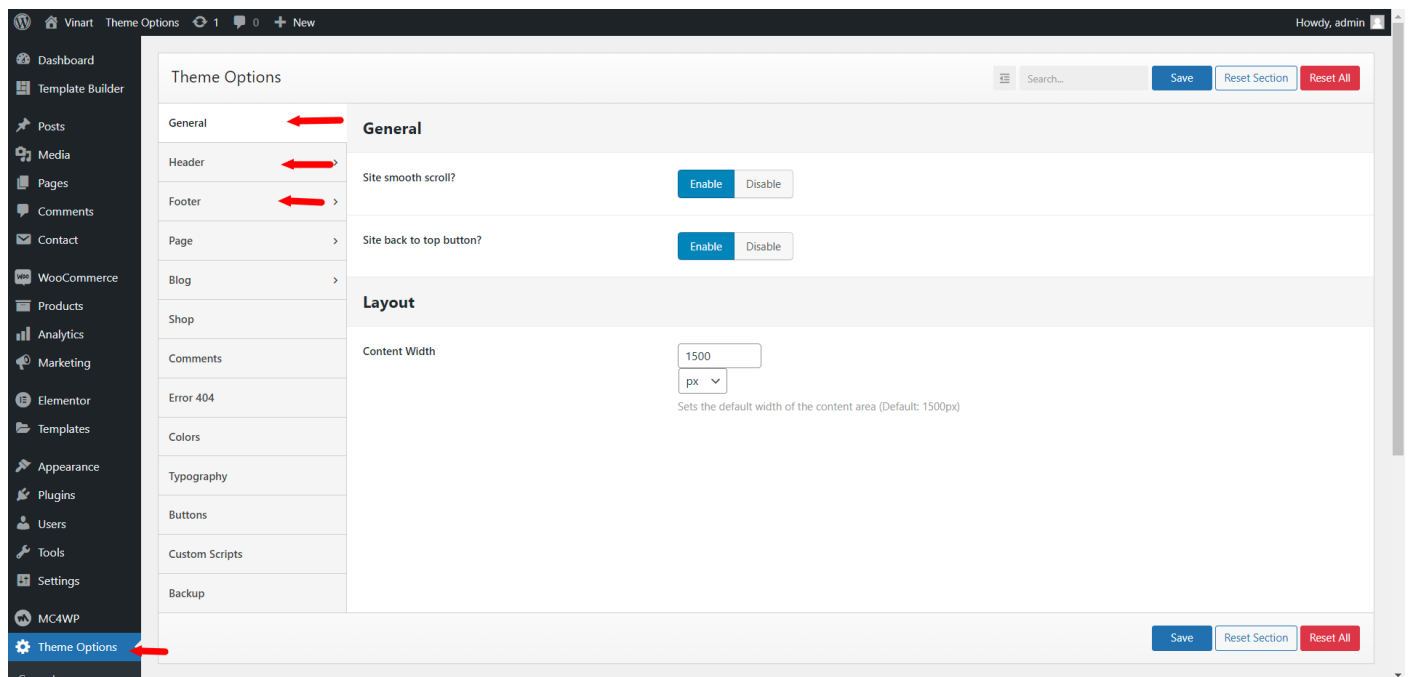

Next, find the **.pot** file in **theme/languages/** folder and load it in [Poedit](#). Translate the strings and then upload the generated file in **wp-content/languages/themes**.

Theme Layout

This section covers how to set your theme layout: header, footer, content.

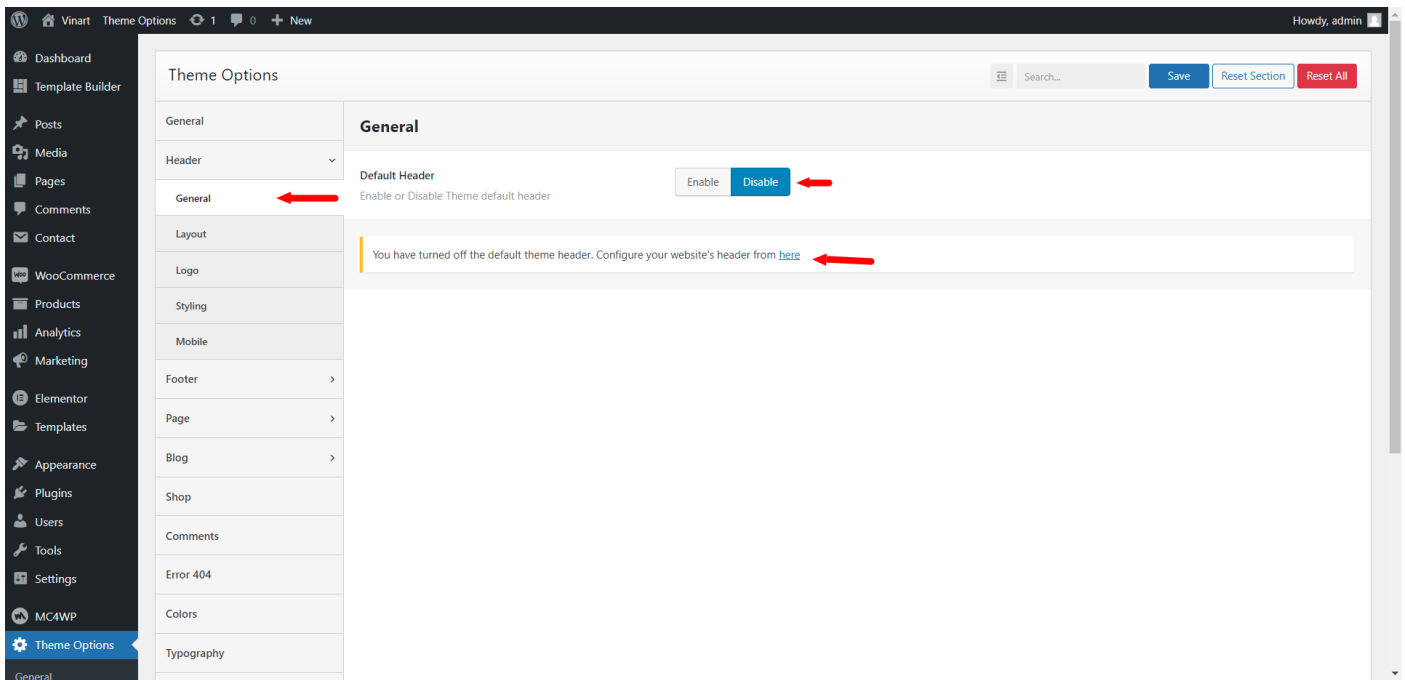

The theme has 2 ways of setting the layout: builtin or Elementor template, you can choose how the layout to be displayed from the Theme Options >> General/Header/Footer.

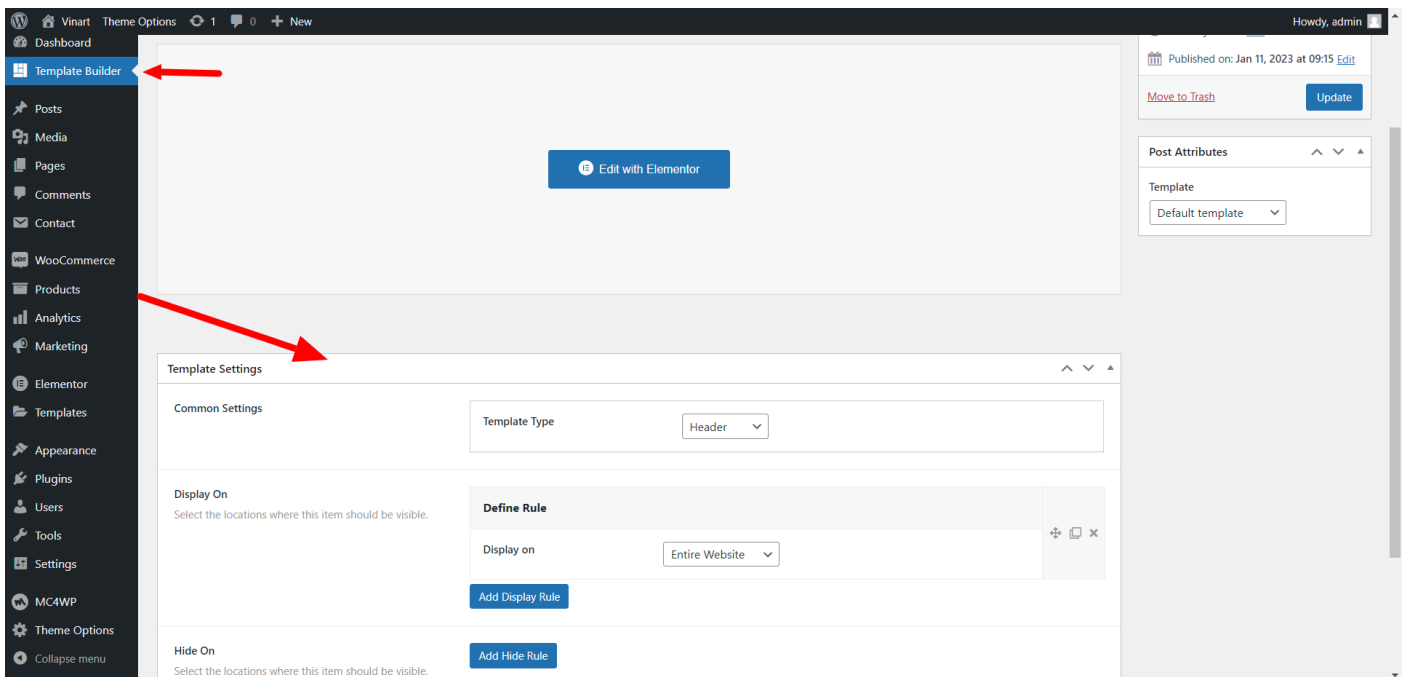

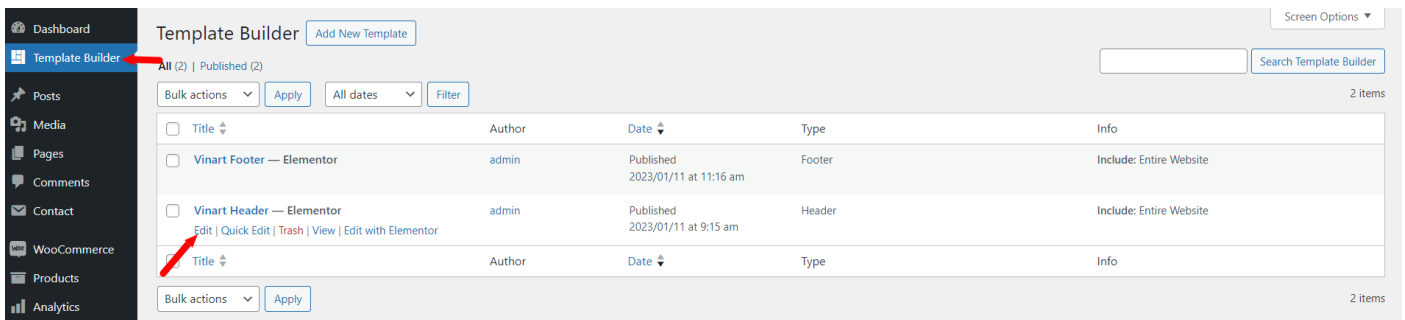

In the case of Header and Footer you have the option to Enable/Disable the Default (builtin) header/footer. Disabling it means that it is inheriting the header/footer created with the Template Builder. You have direct link to that section after you set it to Disable.

Vinart Vineyards Wordpress Theme

Created: 23/05/2024 | By: Cristian Gogoneata | Email: cristian.gogoneata@gmail.com | www.okthemes.com

The Template Builder is a similar to how ElementorPRO allows you to create header and footers. It has options to choose the template type, where to display it or hide it.

Created: 23/05/2024 | By: Cristian Gogoneata | Email: cristian.gogoneata@gmail.com | www.okthemes.com

The theme colors are automatically available in Elementor as Global colors which makes styling the different elements a breeze.

Theme Typography

This section covers how to set your theme typography. Open the Theme Options and go to Typography. You have options to customize the typography for the entire site from here on Desktop or Mobile devices.

General instructions

How to create a page

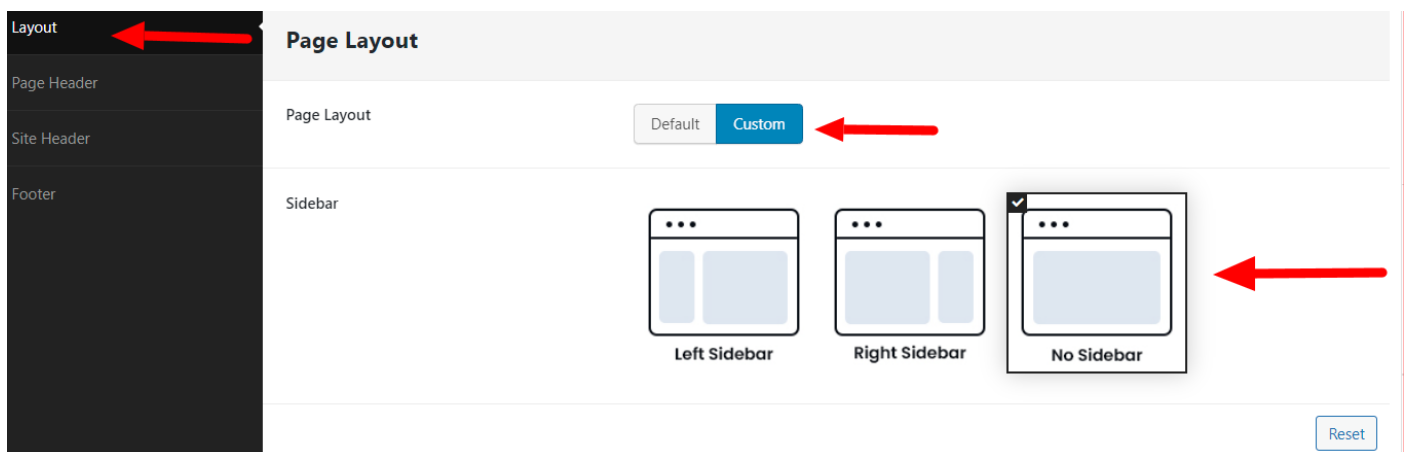

Go to **Pages >> Add new**

Each page has specific options **under the editor**, like page **Layout**, **Page Header** and the possibility to override the Header or Footer with custom settings. This will help you to configure the page as you need. Also, every page supports a header image which can be displayed by adding an image in the **Feature image box**.

Page Layout Options

You have the possibility to select the page layout and the page sidebar. You can configure multiple sidebars in **Appearance >> Theme Options >> Sidebars**

Page Header

You have the possibility to show/hide the header, title, add top title description and set the page styling.

How to create a page template (Blog)

Create a normal page, then go to Settings >> Reading and select that page to be the Posts page.

Vinart Vineyards Wordpress Theme

Created: 23/05/2024 | By: Cristian Gogoneata | Email: cristian.gogoneata@gmail.com | www.okthemes.com

To configure the Blog page please go to **Theme Options >> Blog**

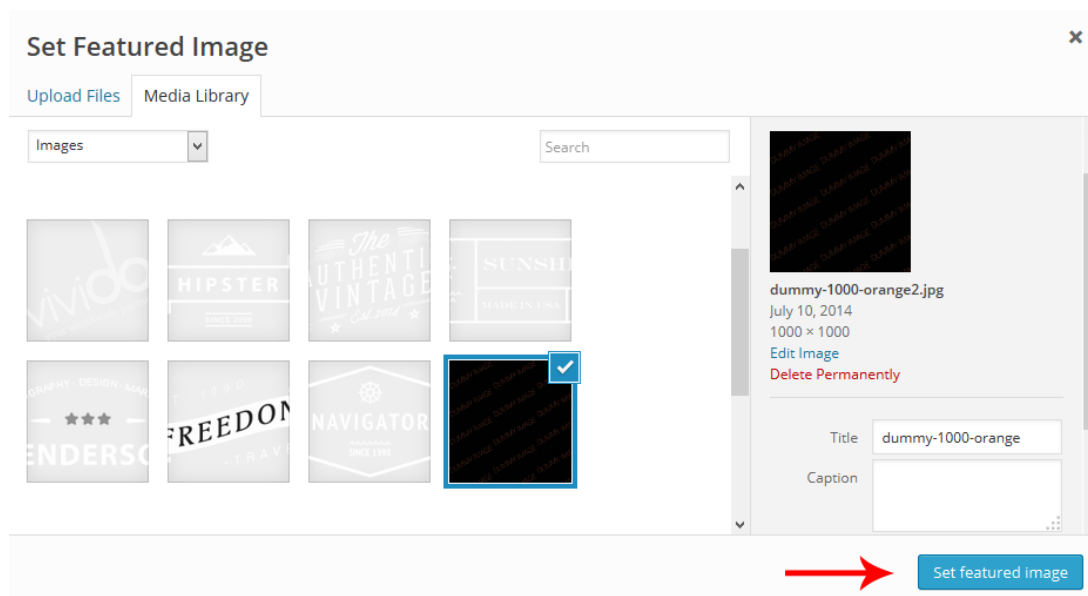

How to insert a featured image (in posts, pages or custom post types)

Each page and post have the possibility to display a featured image. The panel that allows you to upload a feature image looks like this and it's located in the bottom right-hand side of the main panel, under **"Page attributes"**:

To upload an image, click on **"Set featured image"** link. The default media popup will appear.

Click on **"Set featured image"** after you upload your image. See below.

Working with the menu

You can create a menu by going to “**Appearance>>Menus**”

This theme has 2 menu locations.

- Main menu is the theme main menu (in header)
- Footer menu is the theme footer menu (in footer)

To setup a new menu follow the steps bellow.

- Go to **Appearance >> Menus**
- Click on “**Create a new menu**” link
- Give it a name, for example “Demo” then click on “Create menu”

- Then, add whatever pages/posts/categories you need and click save. Tip: To create a submenu drag the menu items to the right.
- Assign the menu to the location you want from “**Menu setting**” panel at the bottom of the page, for example “Main Menu”

Create a blog post

Go to “**Posts**” and create a new blog post:

- Go to “**Posts>> Add new**” (the classic way to create a post in WordPress)
- Insert a title, content and add a featured image
- Choose the post format. Select “Standard” for the normal blog post.

Hit Publish and you’re done.

Configuration of WooCommerce

- A very detailed documentation of WooCommerce can be found here:
<http://docs.woothemes.com/document/woocommerce/>
- To personalize your WooCommerce installation, go to **Theme Options > Shop** panel

Create a homepage

1. Create the page

- Go to Pages >> Add new
- Insert a title, preferably **Homepage** 😊

2. Set the page as homepage

- Go to "Settings >> Reading"
- Select "A static page"
- From "Front page" field select "**Homepage**" (or the name you have given to your homepage)
- Save and you're done

Create a blog page

1. Create the page

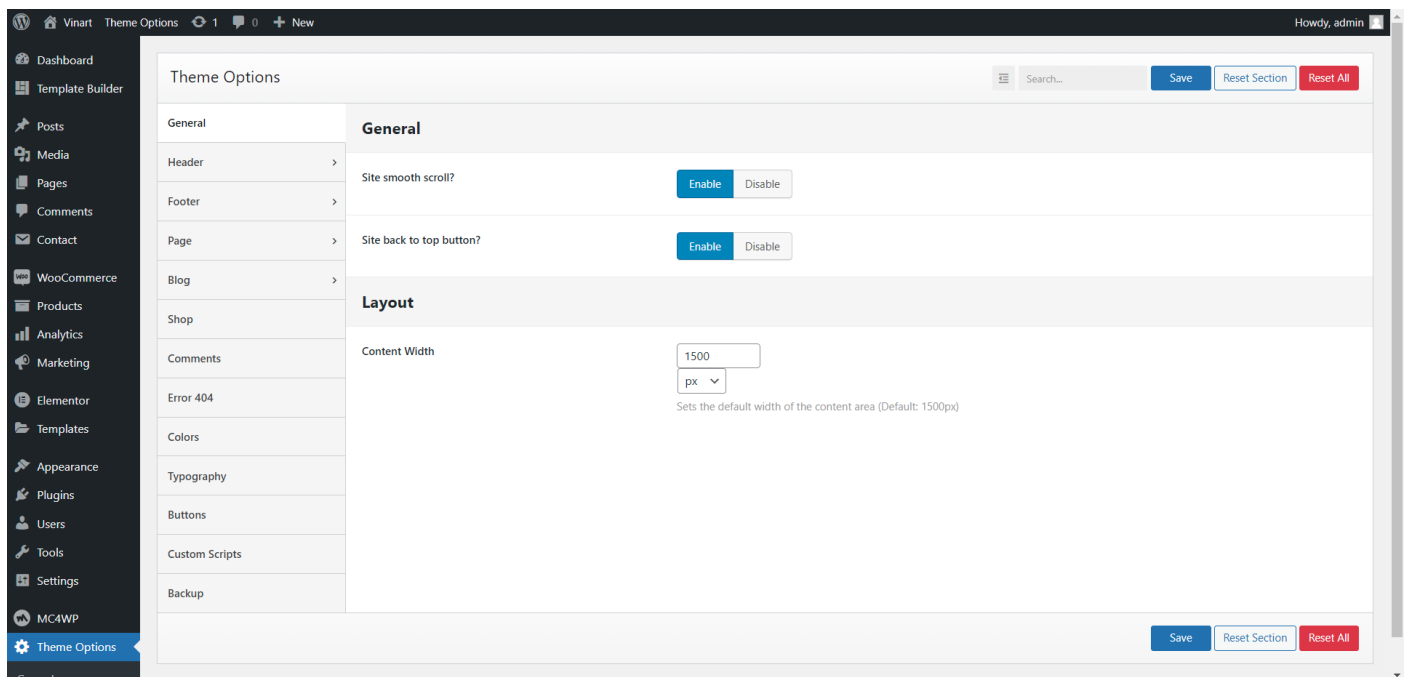

- Go to Pages >> Add new
- Insert a title, preferably **Blog** 😊
- Select the blog template from the page attributes
- Once you select the page different options will appear under the main editor, like: blog layout, blog layout style and blog columns. Customize them as you like.

2. Set the page as blog

- Go to "Settings >> Reading"
- Select "A static page"
- From "Posts page" field select "**Blog**" (or the name you have given to your blog page)
- Save and you're done

Theme options

All theme options are available in the theme options page. You can access it from **Theme Options** or Customizer

Widget areas

This theme has **10 widget areas** (go to "Appearance >> Widgets" to configure them).

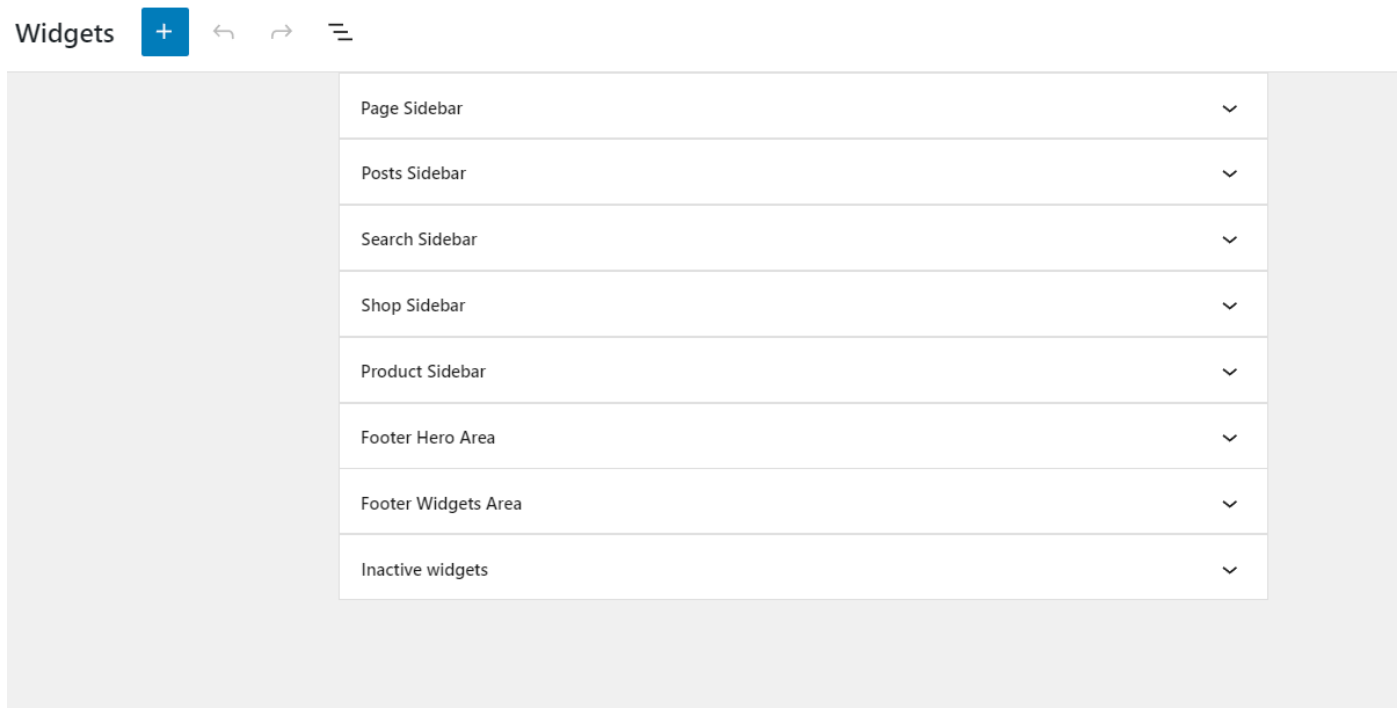

Those areas are:

- Page Sidebar – used on pages
- Posts Sidebar – used on blog posts

Vinart Vineyards Wordpress Theme

Once again, thank you so much for purchasing this theme. As I said at the beginning, I'd be glad to help you if you have any questions relating to this theme. No guarantees, but I'll do my best to assist. If you have a more general question relating to the themes on ThemeForest, you might consider visiting the forums and asking your question in the "Item Discussion" section.
